FLOORING, SAMPLES, MOULDINGS, DESIGN AND LOGISTICS

ABOUT US

We are one of the leading global manufacturer of flooring, samples, and mouldings. We serve as a reliable source for all flooring goods coming straight from our factories to our customers.

We believe that suppling all flooring and accessories in one stop creates a seamless cross-border trade across the world.

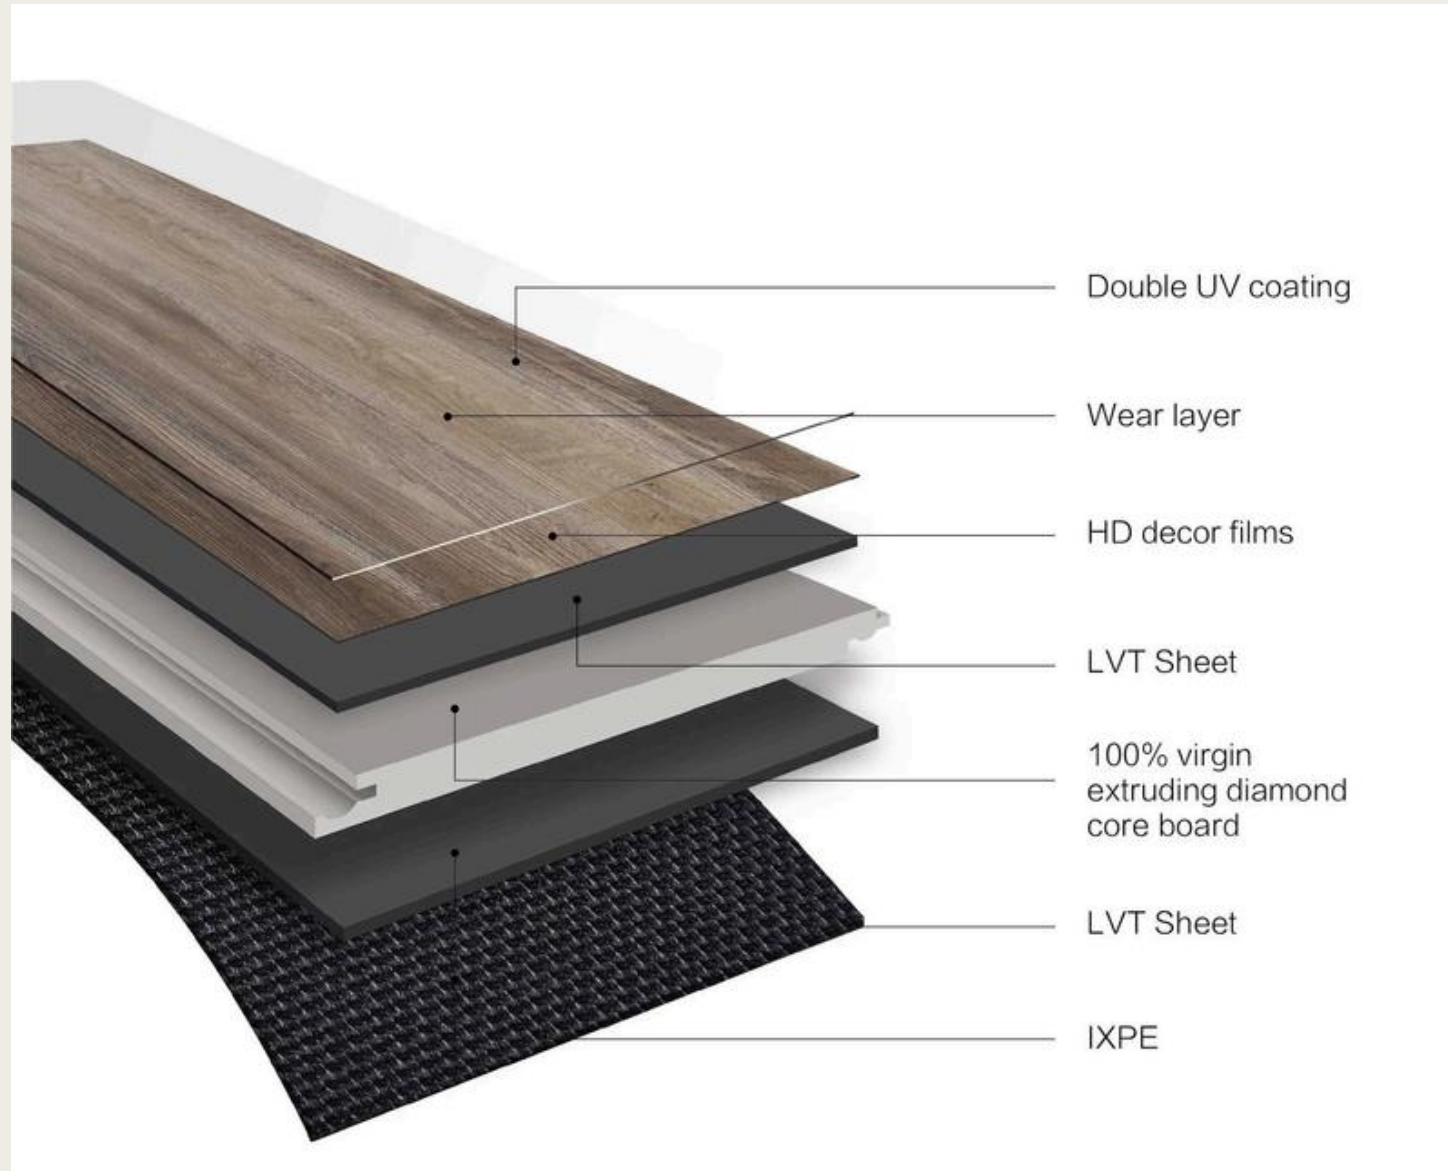

Our team has deep expertise in sales, distribution, manufacturing, and logistics. We are united in our passion and ambition to redefine global trade with our customers who appreciate shared cultural values and preference for quality as well as excellence.

Our factories in Thailand currently supplies the global flooring brands in the industry. The same top quality and experience will be available to all our customers. Our seamless logistics service guarantees efficient and timely delivery, making the process easy and hassle-free for our partners across the USA. With Masteri Flooring, you get not only the best products but a trusted partner dedicated to meeting your unique needs.

Our high-quality products and service have won great trusts and recognition of many customers.

DEFINE THICKNESS, SIZE, BEVEL AND TEXTURE

Durability

Our SPC flooring is designed to withstand heavy foot traffic and resist scratches, dents, and stains, making it ideal for both residential and commercial applications.

Waterproof

100% waterproof construction ensures these floors can be installed in bathrooms, kitchens, and basements without worry about water damage.

Easy Installation

Featuring advanced locking systems that allow for quick and straightforward installation, reducing labor costs and installation time.

QUALITY CERTIFICATIONS

A+ Indoor Air Quality

An A+ rating for emissions of organic compounds, with no impact on indoor air quality within buildings, from France.

Class E1

The Class E1 Formaldehyde Emission, the standard for formaldehyde emissions, as specified by the EN717-1 standard, ensuring compliance with rigorous guidelines for indoor air quality.

The Floorscore Standard

Regarding the emission of organic compounds has no impact on indoor air quality within buildings, as certified by SCS Global Services in the United States of America.

Eurofins Indoor Air Comfort (Gold)

Low emitting products and shows compliance with all relevant VOC-related requirements in Europe.

Low VOC Emissions & Phthalate Free

Enjoy peace of mind knowing that our vinyl flooring emits minimal volatile organic compounds (VOCs), contributing to better indoor air quality. Phthalate, if accumulated within the body, could potentially lead to cancer. This absence ensures a safer and healthier product, prioritizing consumer well-being and environmental sustainability.

OUR COMMITMENT TO A SUSTAINABLE FUTURE

Sustainable Manufacturing Practices

We implement eco-friendly production methods that minimize environmental impact while maintaining the highest quality standards. Our facilities utilize energy-efficient equipment and processes to reduce our carbon footprint.

Forest Conservation

We are committed to responsible sourcing of materials and support initiatives that protect forests and biodiversity. Our supply chain is carefully monitored to ensure compliance with environmental regulations and sustainable practices.

Waste Reduction

Through innovative design and manufacturing processes, we strive to minimize waste at every stage of production. We implement recycling programs and continuously seek ways to repurpose materials that would otherwise be discarded.
